

## Weekly Vulnerability Report

24 March 2025

This report summarizes the Common Vulnerabilities and Exposures (CVEs) which have been modified by the [National Vulnerabilities Database \(NVD\)](#) in the past month. This data can help users prioritise and manage the vulnerabilities that might pose a risk to their organisations.

The report includes a breakdown of the number of CVEs by vendor (top ten) and a table which displays the highest priority CVEs. These include:

- CVEs that have been added by CISA to the Known and Exploited catalogue ([CISA KEV](#)), or
- CVEs with a Common Vulnerability Scoring System (CVSS) score above or equal to 6 and an [Exploit Prediction Scoring System \(EPSS\)](#) score above or equal to 0.2

Each CVE number in the table has a link to the vendor advisory where users can find mitigation or remediation guidance.

## About this data

This report brings together information from several sources including:

- [CISA Known Exploited Vulnerabilities Catalog](#)
- [NVD - National Vulnerabilities Database](#)
- [FIRST - Exploit Prediction Scoring System \(EPSS\)](#). EPSS is an estimate of the probability of the CVE being exploited in the wild in the next 30 days.

**Note:** The information in this report represents a snapshot in time and may become outdated by the time of publication as CVSS or EPSS scores are updated or new vulnerabilities are added to the Known Exploited Vulnerabilities Catalog.
